Swing pricing

Significant subscriptions and redemptions may impact the net asset value of the Sub-Funds because of the portfolio adjustment costs related to investment and divestment transactions. This cost may originate from the difference between the transaction price and the valuation prices, taxes or brokerage fees.

For purposes of preserving the interests of the shareholders present in the Sub-Funds, the Board of Directors of the Company may decide to apply a swing pricing mechanism to any Sub-Fund with a trigger threshold.

As a result, as long as the absolute value of the balance of subscriptions and redemptions of all shares of the relevant Sub-Fund together is greater than the preset threshold, there will be an adjustment to the net asset value. Consequently, the net asset value will be adjusted as follows:

- on a Sub-Fund experiencing levels of net subscriptions on a Valuation Day, the net asset value per Share will be adjusted upwards and;
- on a Sub-Fund experiencing levels of net redemptions on a Valuation Day the net asset value per Share will be adjusted downwards.

The Swing Pricing mechanism has been activated for the Sub-Fund CPR Invest - Smart Beta Credit ESG as from June 26, 2019.

The Swing Factor will normally not exceed 2% of the net asset value of the Sub-Fund unless exceptional market conditions occur.
